[Links To Most Recent Quarterly Refunding Documents](#) | [Upcoming Auction Calendar](#) | [Issuance Profile](#)

Bigger Buybacks, Same Guidance

- Treasury's Quarterly Refunding for August brought limited surprises on the guidance and near-term issuance fronts, but a meaningful set of enhancements to the buyback program.
- Financing estimates for the upcoming quarters were almost exactly in line with MNI's estimates, and reflected a large near-term cash raise via bill issuance.
- With forward guidance on increasing coupon sizes left unchanged, and Treasury clearly leaning on bill issuance to meet borrowing requirements, we are likely to see remaining analyst expectations of an early/mid-2026 upsizing pushed back to later in that year.
- MNI maintains its expectation of the next upsizing coming in August 2026 though risks skew to a later date.
- July's coupon auctions were mixed, with no clear strength in any particular segment of the curve.

Borrowing Requirements Upped In Line With MNI Expectations

Treasury's estimates of privately-held net marketable borrowing for the July - September 2025 and October - December 2025 quarters released Jul 28 were almost exactly in line with MNI's estimates ([Sources and Uses Table here - PDF](#)).

- We would characterize the current quarter borrowing estimates as slightly on the high side of the median analyst expectation, with the latter quarter fairly close to expectations given what is usually a wide range for the further-out quarter. As such this had little to no impact on expectations for Wednesday's Refunding announcement.
- **For the Jul-Sep quarter**, Treasury expects a \$525B financing need (MNI expected \$532B) with a \$1007B borrowing requirement (MNI expected \$1000B), with cash rising \$393B to \$850B by quarter-end (in line with consensus). Analyst borrowing requirement estimates for this quarter ranged from \$942B - \$1,087B.
- This represents a borrowing estimate \$60B higher than announced in April's refunding, when excluding the cash raise that is now expected following the lifting of the federal debt limit (\$453B more borrowing this quarter on \$393B more cash by end-quarter).
- **For the Oct-Dec quarter**, Treasury expects a \$494B financing need (MNI expected \$525B) with a \$590B borrowing requirement (MNI expected \$600B), with cash remaining at \$850B at quarter-end. Analyst borrowing requirement estimates for this quarter ranged from \$534B - \$726B.
- Note that regarding the April-June quarter, "excluding the lower than assumed end-of-quarter cash balance, actual borrowing was \$56 billion lower than announced in April".

Policy Statement: Guidance Unchanged, TIPS Sizes Upped, Bills To Increase A Little More

The main outcomes from Treasury's quarterly [Policy Statement](#) out Jul 30 were largely as expected:

- **Guidance:** The retaining of existing policy guidance was as expected by most: "Based on current projected borrowing needs, Treasury anticipates maintaining nominal coupon and FRN auction sizes for at least the next several quarters." Some analysts however had expected this to be tweaked to suggest a possible change in nominal coupon sizes as soon as early 2026.
- We expect that lingering expectations of a February upsizing will be pushed back to later in the year. At least one analyst, Citi, revised its expected starting date (to Nov 2026 from May 2026) following this release.
- Prior to this refunding, MNI had pushed back our expectation for the next upsizing to August 2026 from February 2026, and we maintain this expectation though acknowledge risks to a later upsizing.
- **TIPS Sizes Upped:** Also as widely expected, the only change to issuance sizes were for 5Y and 10Y TIPS which increased for the upcoming quarter: ("Treasury plans to maintain the August 30-year TIPS reopening auction size at \$8 billion, increase the September 10-year TIPS reopening auction size to \$19 billion, and increase the October 5-year TIPS new issue auction size to \$26 billion."). Further increases are likely for future quarters. See table below.
- **Bills:** Bill sizes will be upped a little more amid the Treasury General Account rebuild post-debt limit raise: "Treasury anticipates further marginal increases in short-dated Treasury bill auction sizes in the coming days and then maintaining sizes at or near those levels through the end of September. Additional increases to Treasury bill auction sizes are anticipated in October."

Estimated issuance - Nominal (ex SOMA reinvestments)

Treasury Ups Buybacks Roughly As Expected, Tweaks Frequencies

The major development in August's Refunding announcement was on buybacks, as widely expected. " Treasury believes it is appropriate to: (1) double the frequency of long-end nominal coupon liquidity support buybacks, (2) make a technical adjustment to the TIPS buyback buckets, (3) increase the size of cash management buybacks, and (4) allow a limited number of additional counterparties to directly access buyback operations. "

- The new quarterly buyback schedule [is here](#).
- The announced liquidity operations buyback schedule is roughly in line with expectations - both higher in frequency (doubling frequency of operations of longer-end instruments in the quarter to 4x from 2x) and in

aggregate size (\$38B / qtr from \$30B / qtr). We'd seen expectations that the new aggregate size could be \$34B all the way up to \$60B so this is perhaps on the low side of expectations but not a big surprise.

- The key here is that the entire increase is in the 10-20Y and 20-30Y range, for which aggregate quarterly buybacks are doubled to \$8B.
- For TIPS, Treasury is adjusting the buyback buckets by introducing 1-10Y and 10-30Y buckets (previously the buckets were (1-7.5Y, and 7.5-30Y). There will be 2x operations quarterly for up to \$750M for 1-10Y TIPS, and one for up to \$500M in 10-30Y.
- Skipping cash management buybacks around the September tax date is only a modest surprise (they will resume in December). That having been said, Treasury is increasing the aggregate size of cash management buybacks from a maximum par amount of \$120B annually to \$150B annually. We hadn't seen too many expectations either way on that front.
- Finally, Treasury is expanding access to buybacks for more counterparties: "in the first half of 2026 Treasury plans to offer direct buyback access to a limited number of additional counterparties based on their participation in Treasury auctions".
- All of these were mentioned in the May refunding as possible future adjustments to the program ("changes to maximum purchase amounts, buyback operation scheduling and frequency, security eligibility, maturity bucket composition, execution process, and counterparty eligibility").

TBAC Had Misgivings Over Buyback Optics, Rising Term Premia

It was interesting to see that the Treasury's private sector advisory group (Treasury Borrowing Advisory Committee, or TBAC) had misgivings over the optics of increasing longer-end liquidity buybacks as it could be seen as an adjustment of the maturity profile of privately-held debt. Indeed, the decision to up 10-20 and 20-30Y buyback sizes and not sizes across the curve didn't appear to be a unanimous recommendation. TBAC also suggested that it was possible to double the size of the buyback program within the requisite parameters and objectives. The full TBAC report to Treasury [is here](#).

- In determining what buyback sizes to recommend, TBAC reiterated that "the Committee focused heavily on Treasury's stated objective: liquidity support buybacks are not intended to change the overall maturity profile of debt outstanding." And "in order to quantify that, the Committee reviewed the 3y standard deviations of annual changes in WAM (2 months across all environments, 1 month across non-recessionary environments). The Committee noted that the current program, if executed fully at maximum sizes offered, shortens WAM by 0.4 months per year – well within the typical 1y change. The Committee felt that there was therefore capacity to double the program, if appropriate, without materially impacting WAM."
- However, "There was some debate among Committee members as to whether concentrating an increase in liquidity support buybacks in certain sectors of the curve could be misconstrued as WAM management, and **for that reason many members felt a uniform increase across the curve, even though take up might routinely be below capacity, would be preferable**. The majority of the Committee felt that they would be more comfortable recommending larger increases, or sectoral specific increases, if there was a more directly visible incorporation of the buyback program related funding needs into Treasury's overall issuance decision."
- And "there was some discussion as to when weakness in certain sectors, as evidenced by the presenting member's buyback score, warranted a buyback adjustment versus an issuance reconsideration. Regardless, the Committee felt that communication to the market was critical to ensure the program was not misconstrued to be active WAM management. Overall, the Committee felt there was scope to make the program larger and more responsive to evolving market conditions, while still being regular and predictable. However, **it would be critical that Treasury monitor and adapt to any material buyback-driven change in debt distribution. The Committee feels strongly that issuance is the primary tool for managing the debt profile.**"
- **The committee also noted that it could be a good time to reassess the "optimal debt structure" given a rise in term premia.** Versus a Q3 2023 TBAC study: "term premium has increased modestly more than the scenarios considered, suggesting that a refresh of the optimal debt structure analysis could be beneficial. Additionally, the Committee discussed the fact that evolution in demand patterns suggests increased demand in front end and intermediate maturities relative to reduced demand in longer end maturities."
- **Additionally, there appeared to be some debate about Treasury's forward guidance on coupon upsizing:** "Given the breadth of uncertainty relating to both receipts and expenditures, the Committee was mixed on whether adjustment to Treasury's expressed expectations of future changes was necessary."

Upcoming Issuance And Buybacks

- **Upcoming issuance:** August's issuance schedule is set to see \$324B in nominal Treasury coupon sales (unchanged from the last refunding month of May), in addition to \$8B in 30Y TIPS and \$28B FRN for a total of \$360B (lowest overall total since September 2024). Sales for the month start on Tuesday Aug 5 with \$58B of 3Y Note, Wednesday Aug 6 with \$42B of 10Y Note, and Thursday Aug 7 with \$25B of 30Y Bond.
- **Buybacks:** The past quarter's buyback results and the upcoming schedule are included later in this publication.

July Auction Review:

- 2Y Note trade-through: 3.920% vs. 3.925% WI.
- 2Y FRN: 0.159% high margin vs. 0.157% prior
- 3Y Note tail: 3.891% vs. 3.887% WI.
- 5Y Note tail: 3.983% vs 3.973% WI.
- 7Y Note trade-through: 4.092% vs. 4.120% WI.
- 10Y Note trade-through: 4.362% vs. 4.365% WI.
- 10Y TIPS: 1.985% high yield vs. 2.220% prior
- 20Y Bond trade-through: 4.935% vs 4.950% WI.
- 30Y Bond tail: 4.889% vs. 4.888% WI.

Numbers indicate auction stop-through (+)/tail (-) in basis points.
Size of bar based on RSI. Source: MNI

July's coupon auctions were mixed, with no clear strength in any particular segment of the curve. Two extremely strong 7- and 20-year sales contrasted with a very weak 5-year sale. Other auctions were relatively uneventful.

- The 7-year auction registered its highest reading on MNI's Relative Strength Index (RSI) since August 2023. The 2.8bp trade-through came alongside a primary dealer take-up of just 4.1% - the lowest on record.
- The 20-year Bond auction was also strong, with a 1.5bp trade-through coming after two consecutive tails in May and June. Primary dealer take-up slipped to 10.7% from 13.4% in June.
- On the other hand, the 5-year auction saw a 1bp tail and the lowest MNI RSI since January 2024. It is possible that appetite for the 5-year Note was hampered by the presence of \$69B in 2-year Note supply just 90 minutes before the auction on July 28.

Chronological Auction Review:

July 8: \$58B 3Y Note (91282CNM9), 3.891% vs. 3.887% WI

- Treasury futures saw little reaction after the \$58B 3Y note auction (91282CNM9) tailed again: 3.891% high yield vs. 3.887% WI; 2.51x bid-to-cover vs. 2.52x prior.
- Indirect take-up: 54.11% vs. 66.78% prior.
- Direct bidder take-up: 29.38% vs. 18.03% prior.
- Primary dealer take-up: 16.51% vs. 15.19% prior.
- The next 3Y auction is tentatively scheduled for August 5.

July 9: \$39B 10Y Note (91282CNC1), 4.362% vs. 4.365% WI

- Treasury futures held near session highs after the \$39B 10Y note auction re-open (91282CNC1) stopped through: 4.362% high yield vs. 4.365% WI; 2.61x bid-to-cover vs. 2.52x prior.
- Indirect take-up: 65.42% vs. 70.56% prior.
- Direct bidder take-up: 23.70% vs 20.48% prior.
- Primary dealer take-up: 10.87% vs. 8.96% prior.
- The next 10Y auction is tentatively scheduled for August 6.

July 10: \$22B 30Y Bond (912810UK2), 4.889% vs. 4.888% WI

- Treasury futures held weaker after the \$22B 30Y auction re-open (912810UK2) came out largely in-line: 4.889% high yield vs. 4.888% WI; 2.38x bid-to-cover vs. 2.43x prior.
- Indirect take-up 59.78% vs. 65.16% prior
- Direct bidder take-up 27.40% vs. 23.42% prior
- Primary dealer take-up 12.82% vs. 11.41% prior.
- The next 30Y auction is tentatively scheduled for August 7.

July 23: \$13B 20Y Bond (912810UL0), 4.935% vs. 4.950% WI

- Treasury futures consolidated slightly after the \$13B 20Y Bond auction (912810UL0) reopen traded through: 4.935% high yield vs 4.950% WI; 2.79x bid-to-cover vs. 2.68x prior.
- Indirect take-up at 67.43% vs. 66.74% prior,
- Direct bidder take-up 21.86% from 19.88% prior.
- Primary dealer take-up of 10.72% vs 13.37% prior.
- The next 20Y auction is tentatively scheduled for August 20.

July 24: \$21B 10Y TIPS (91282CNS6), 1.985% high yield vs. 2.220% prior

- July's \$21B 10Y TIPS auction (91282CNS6) saw a 1.985% high yield vs. 2.220% prior; allotment 75.33% vs 37.79% prior. 2.41x bid-to-cover vs. 2.36x prior.
- Indirect take-up: 62.69% vs 71.39% prior.
- Direct take-up: 31.95% vs. 16.70% prior.
- Primary dealer take-up: 5.36% vs. 11.91% prior.
- The next 10Y TIPS auction (re-open) is tentatively scheduled for September 18.

July 28: \$69B 2Y Note (91282CNP2), 3.920% vs. 3.925% WI

- Treasury futures gained slightly after the \$69B 2Y note auction (91282CNP2) traded through: 3.920% high yield vs. 3.925% WI; 2.62x bid-to-cover vs. 2.58x prior.
- Indirect take-up: 55.33% vs 60.50% prior
- Directs take-up: 34.37% vs. 26.33% prior
- Primary dealer take-up: 10.30% vs. 13.17% prior.
- The next 2Y auction is tentatively scheduled for August 26.

July 28: \$70B 5Y Note (91282CNN7), 3.983% vs 3.973% WI

- Treasury futures dipped after the \$70B 5Y note auction (91282CNN7) tailed: 3.983% high yield vs. 3.973% WI; 2.31x bid-to-cover vs. 2.36x prior.
- Indirect take-up: 58.28% vs. 64.68% prior
- Direct take-up: 29.50% vs. 24.44% prior
- Primary dealer take-up: 12.23% vs. 10.88% prior.
- The next 5Y auction is tentatively scheduled for August 27.

July 29: \$30B 2Y FRN (91282CNQ0), 0.159% high margin vs. 0.157% prior

- July's \$30B 2Y FRN auction (91282CNQ0) saw a high discount margin of 0.159% vs 0.157% prior; allotment 33.43% vs 65.53% prior, bid-to-cover 2.81x vs. 2.79x prior.
- Indirect take-up: 59.73% vs 45.61% prior.
- Direct take-up: 0.83% vs. 0.89% prior.
- Primary dealer take-up: 39.44% vs. 53.50% prior.
- The next 2Y FRN auction (re-open) is tentatively scheduled for August 27.

July 29: \$44B 7Y Note (91282CNR8), 4.092% vs. 4.120% WI

- Treasury futures extended session highs after the \$44B 7Y note auction (91282CNR8) traded through: 4.092% high yield vs. 4.120% WI; bid-to-cover 2.79x from 2.53x prior.
- Indirect take-up 62.26% vs. 76.74% prior
- Direct take-up: 33.68% vs. 11.62% prior
- Primary dealer take-up: 4.06% vs. 11.64% prior.
- The next 7Y auction is tentatively scheduled for August 28.

Chronological Buyback Review:

July 2: \$2.0B Liquidity Support Operation - Nominal Coupons (20Y to 30Y)

- CUSIPs on offer: 36
- CUSIPs bought back: 10 (912810RX8 - \$1.000B; 912810SK5 - \$0.260B; 912810RU4 - \$0.250B)
- Total Par Amount Offered: \$18.738B
- Total Par Amount Accepted: \$2.000B

July 10: \$4.0B Liquidity Support Operation - Nominal Coupons (5Y to 7Y)

- CUSIPs on offer: 26
- CUSIPs bought back: 11 (Three largest buybacks: 91282CEP2 - \$0.340B; 91282CJQ5 - \$0.250B; 91282CHR5 - \$0.220B)
- Total Par Amount Offered: \$3.924B
- Total Par Amount Accepted: \$1.25B

July 16: \$0.5B Liquidity Support Operation - TIPS (1Y to 7.5Y)

- CUSIPs on offer: 25
- CUSIPs bought back: 6 (Three largest buybacks: 91282CDX6 - \$0.225B; 9128283R9 - \$0.100B; 91282CLV1 - \$0.075B)
- Total Par Amount Offered: \$2.526B
- Total Par Amount Accepted: \$0.500B

July 23: \$4.0B Liquidity Support Operation - Nominal Coupons (3Y to 5Y)

- CUSIPs on offer: 49
- CUSIPs bought back: 15 (Three largest buybacks: 91282CEB3 - \$1.000B; 91282CHF1 - \$0.675B; 91282CES6 - \$0.600B)
- Total Par Amount Offered: \$14.791B
- Total Par Amount Accepted: \$4.000B

Definitions

Auction participants

Direct bidders are individuals or organizations that purchase Treasuries during an auction for themselves or their house account. Indirect bidders place competitive bids at Treasury auctions through primary dealers and can include foreign central banks and domestic money managers. Primary Dealers round out auction participants. In general, a high primary dealer take-up indicates a weaker auction as primary dealers have effectively had to backstop the auction.

Auction performance:

Auction performance is deemed average when the auction high yield meets or closely approximates the When-Issue (WI) rate going into the auction. Weak auctions have a high yield greater than the WI rate, strong auctions a high yield lower than the WI rate.

NY Fed explains "secondary market transactions in outstanding Treasury securities typically settle on the business day after the trade date, when sellers deliver securities to buyers and receive payment. When-issued transactions, by contrast, settle on the issue date of the new security (which can be as much as a week or more after a trade is negotiated) because the security is not available for delivery at any earlier date."

UST Buyback January 2025 to November 2025 Calendar
