| Friday, Oct 17 | 1300 | ** | Baker Hughes Rig Count Overview - Weekly | Baker Hughes |
| Friday, Oct 17 | 1600 | ** | TICS | Dept of Treasury |

Release Notes

The Department of Labor's shutdown plans and subsequent announcements point to no data published during the shutdown. MNI does not expect any BLS data to be released during shutdown.

BLS Nonfarm Payrolls CNN cited Democratic Sen Elizabeth Warren in [an exclusive](#) on Oct 2 reporting that "Employees furloughed at the BLS have told Warren's office the September labor data has been collected and is likely ready to be released". CNN writes that "Warren sent a letter on Tuesday to William Wiatrowski, the acting commissioner of the BLS, and Russ Vought, Trump's budget chief, requesting the jobs report get released on Friday as previously scheduled. "While the data has been processed and there was time to prepare for the data's release in the event of a government shutdown, the Administration is choosing not to release Friday's jobs report," Warren wrote in a letter shared with CNN."

Even if it's true that the data is ready to be published (as seen above, the term reportedly used by the cited furloughed BLS employees is "likely"), it's doubtful the administration will respond favorably to a request from Sen Warren, and there is no sign that the BLS is preparing to publish before the shutdown is over. As such MNI would highly doubt there is any chance the payrolls data gets released Friday.

EIA Data The EIA advised on Oct 1: "The U.S. Energy Information Administration (EIA) will be able to operate for a period of time during the lapse in appropriations. Until further notice, the EIA.gov website will continue to be updated, and publications will continue to be released according to established schedules." They released data as expected on Oct 2.

WASDE Data The Dept of Agriculture's shutdown plan suggests no release and nothing was released on Thu Oct 2: "The Department will cease operations related to: ... research and report publications, website updates, data products"

Treasury For Monthly Treasury Statement, "Fiscal Service continues to support activities during a lapse in appropriation when sources of funding exist that have not lapsed." For TICS, "When Federal Government offices in Washington D.C. are closed on a release date, that date will be revised after offices reopen."

Federal Reserve The Federal Reserve and regional Fed banks are not subject to the shutdown and will continue to release data and reports as normal.
