

US LNG Weekly Recap - Week of 10/10/2025

Weekly Highlights

- **Golden Pass LNG:** Purchased a “cool-down” cargo scheduled for delivery sometime between Oct. and Nov., according to Bloomberg sources. Applied for FERC approval to place into service its MP 69 compressor station on or around Dec. 1 to coincide with its approved gas tariff and settlement rates going into effect. Originally nominated day-ahead feedgas of more than 8.5 MMcf/d on October 8 were revised in-day to 1.8 MMcf/d, but reached in-day nominations of 7 MMcf/d on October 9, a record since the facility began receiving small volumes in July. Still working through pre-commissioning process. Set to launch at the very end of 2025 or early 2026, and seen to have an impact on global supply only from Q1-2026 onwards, according to the latest OIES Quarterly Gas Review.
- **Plaquemines:** FERC approved the LNG facility's request to introduce hazardous fluids into Booster Gas Compressor C in Phase 2 of the project.
- **Cove Point:** Maintenance should wrap up sometime next week.

Daily L48 LNG Feedgas Total

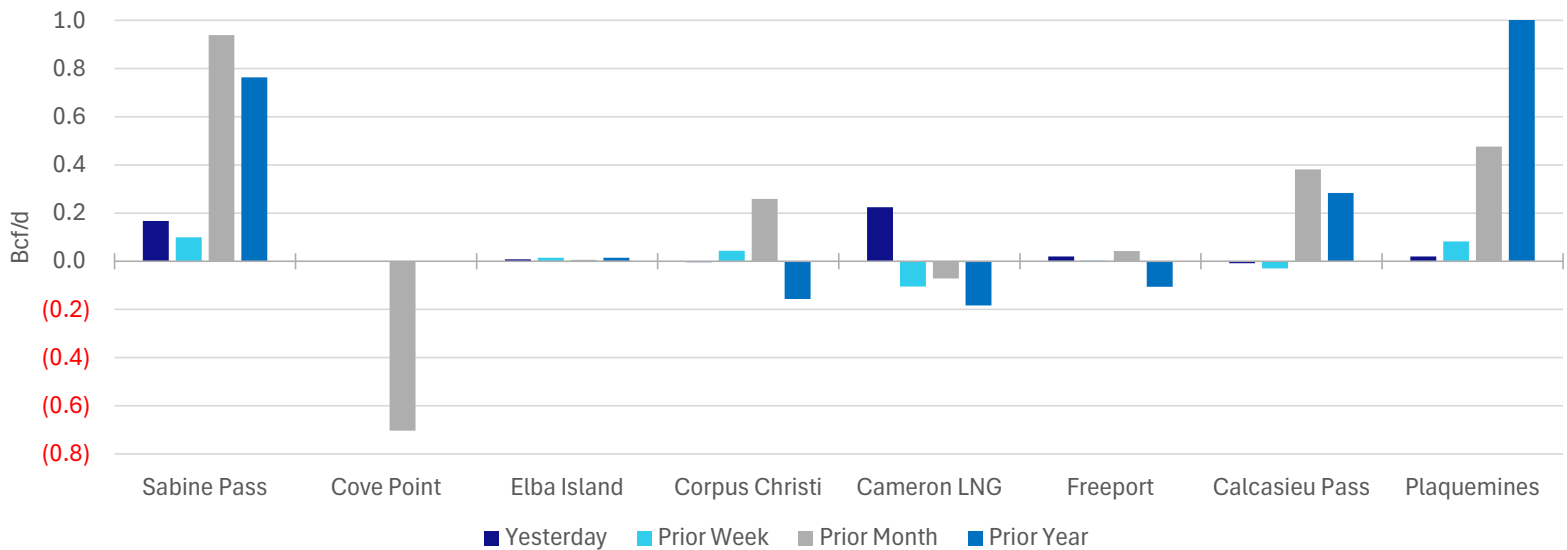

Absolute Feedgas Volume by Facility (Bcf/d)

	Sabine Pass	Cove Point	Elba Island	Corpus Christi	Cameron LNG	Freeport	Calcasieu Pass	Plaquemines	Golden Pass	Total
