

MNI's Data suite provides fast, granular and actionable proprietary data. MNI historical database offerings, as well as fast delivery of key data points, can be integrated into workflows, platforms and models to deliver actionable insights and identify key opportunities.

MNI High Speed Calendar

- MNI High Speed Calendar provides economic data releases at high speed from a trusted news source. The calendar covers over 500 economic data points and major central bank rate decisions. The calendar also has customizable features allowing the user to tailor the display to their requirements and individual trading time zones along with new features that allows easy access to MNI's central bank preview/review reports and download of events to Outlook 365 or Google Mail. The HSC provides instant, granular macro data – CPI, NFP, Labour, Bond Auctions – plus unique Central Bank insights.

MNI Chicago PMI

- The Chicago Report, also known also as the Chicago Business Barometer™ or more commonly called the Chicago PMI is a forward-looking indicator of US economic activity. Focusing on Chicago's dynamic business sector, the Barometer is closely correlated to the official US gross domestic product (GDP) data and provides better forward guidance than similar regional surveys. This is a product unique to MNI, produced by in-house experts, with 15+ years of time-series data across 6 sub-indices with correlations.

MNI China Money Markets Index

- The market's only key measure of liquidity conditions and rate expectations in China, and therefore highly valuable to any trader/investor. The survey gauges the opinions of local Chinese interbank traders using 6 key indicators. The MMI gauges the opinion of traders with financial institutions operating in the interbank market, the country's main platform for trading money-market, bond and currency instruments, and the main funding source for financial institutions.

MNI EGB Issuance

- MNI provide a machine-readable aggregation of backdated and future issuance for EGB, Gilts, and UST, delivered weekly or daily via FTP or CSV. The full dataset is from 2020 onwards, including future issuance (typically a quarter ahead or year-end). Size estimates are available for the next 5 weeks; confirmed sizes (eg. Germany) are included further out. The database covers all Eurozone syndications and auctions from the 12 largest issuers, plus EU, EFSF, and ESM.
