

MNI's Energy service offers real-time, actionable intelligence and insight on global oil/oil product, natural gas & LNG markets, plus the European power and carbon markets delivered in a concise format via the MNI website, API and 3rd party chat platforms.

Oil&Gas

- Minute by minute insight on market price action, including: product spreads, options & swaps
- Industry insight on the following:
 - Production and consumption dynamics
 - Inventories, reserves, independent stocks
 - Shipping updates, major projects & refining news
- Real-time political & geopolitical risk analysis
- Key macro reports, including: previews ahead of Fed rate decisions, US CPI & NFP releases, global macro outlook commentaries & more

Power

- Contextualized coverage of European power, carbon and natural gas markets and via third party chat platforms & the MNI website during trading hours
 - Power market and price updates for CWE, UK, the Nordics and Italy
 - Carbon market and price updates for the EU and UK compliance markets
 - Natural/gas and LNG market and price updates for the wider European market
- Start of trading day summaries for power, carbon and natural gas markets including a snapshot of changes in fundamentals, prices, news, weather etc.
- Fundamentals analysis, remit, power flows, generation data, spark/dark spreads
- Renewables and weather forecast for different regions

WHY YOU NEED THIS:

- Our specialist team includes former energy traders, industry experts, political analysts & macroeconomists, with full analyst interaction available. The service combines short, medium and long-term analysis to keep clients abreast of the market, utilising our Markets and Policy team's exclusive reporting and real time analysis.
